

## General Description

The SDP358 consists of two independent, high gain and Internally frequency compensated operational amplifiers, it is specifically designed to operate from a single power supply. Operation from split power supply is also possible and the low power supply current drain is independent of the magnitude of the power supply voltages.

## Features

- Internally frequency compensation
- High voltage gain:100dB(Typical)
- Low input bias current:20nA(Typical)
- Low input offset voltage:2mV(Typical)
- Large output voltage swing:  $0V \sim (V_{CC}-1.5V)$
- Wide power supply voltage range:  
Single supply: 3V to 18V  
Dual supplies:  $\pm 1.5V$  to  $\pm 9V$
- Low supply current drain:0.25mA(Typical)

## Applications

- Battery Charger
- Cordless Telephone
- Switching Power Supply
